

PF Theory Assignment 1 26/11/2016 BSAI-1A Date: M. Uzair

Part A Question 3

Algorithm: Take a number N input and check the number of digits using condition statements

Pseudocode:

INPUT N

IF $N < 10$ Then

Print Output "Single digit"

Else IF $N < 100$ Then

Output "Double digit"

Else

Output "Triple digit (or more)"
