

Part A Question 5

Algorithm:- Take the number input and extract the digit one by one ~~by~~ with the help of MOD and DIV and sum them and use a loop to store the number of digits.

Pseudo code:-

INPUT N

$Sum \leftarrow 0$ $Temp \leftarrow N$

WHILE $Temp \neq 0$ THEN DO

$Sum \leftarrow Sum + Temp \text{ MOD } 10$

$Temp \leftarrow Temp \text{ DIV } 10$

ENDWHILE
