Question 3

```
Global max = 50
FUNCTION input reading ( temp [ ][ max], ~~Sensor~~ , 2 )
    ~~DECLARE~~
    for (int i = 0 ; i < 5 ; i++) {
        ~~print~~ for (int j = 0 ; j < h ; j++){
            INPUT temp [i][j] // Taking readings
            input and storing them in array
            } END FOR
        } END FOR
END Function
Function analyse Sensor( r[], n, Sum, avg, max, min
                         crit, warn, Streak )
~~total~~ = 0 DECLARE j, curr = 0 INTEGER
~~total~~ Sum = 0, crit = 0, warn = 0, Streak = 0
~~max, min =~~ max = r[0], min = r[0]
for( j = 0; j < n ; j++ ) {
    ~~total~~ Sum = Sum + r[j]
if (r[j] > max) THEN {max = r[j] // END IF
if (r[j] < min) THEN min = r[j] // END IF
if (r[j] ≥ 40) THEN crit = crit + 1 // END IF
elseif (r[j] ≥ 35) ~~then~~ Then warn += 1 ~~END IF~~ END IF
~~if~~ if (r[j] ≥ 35) { THEN { curr = curr {
        if ( curr > Streak) { Streak = curr ++ } } END IF
                                              END IF
    else curr = 0 }/
avg = total / n
END Function
```

Date:
